

BENNETT DETAILED ENGINEERING

Bennett's Services Expand to Include Detailed Engineering

As a member of Keppel Offshore and Marine, Bennett Offshore is able to bring systems and detailed engineering services to our clients. We are partnered with construction-based engineers whose extensive experience and vast in-house libraries of design information have allowed them to set world records in offshore unit construction. In 2013, Keppel FELS alone delivered a record 21 new-build MODUs. This level of efficiency is achieved through a diverse understanding of various offshore and marine systems and a keen sense of construction practicality.

Complementing our design experience is the use of technology and standards commonly accepted by classification societies and other regulatory bodies. The utilization of 3D CAD software such as SM3D, TRIBON and PDS allows for more optimized design workflows and troubleshooting capabilities, such as clash detection.

From concept design and front end engineering design (FEED) through detailed design and class approvals, our affiliate partnerships allow Bennett Offshore to provide clients with true turnkey engineering services.

Bennett Offshore, LLC
5177 Richmond Ave., Suite 1188
Houston, TX 77056, USA
+1 713.961.7737
www.bennettoffshore.com

- Jack-ups & semisubmersibles
- Liftboats & self-elevating platforms
- Drillships & FPSOs
- Tension leg platforms
- Accommodation topsides
- Submersible barges

Systems Design & Engineering

- HVAC & ventilation
- Electrical & instrumentation (E&I)
- Piping
- HSE studies (HAZOP, HAZID etc)
- 2D & 3D drafting, CAD (SM3D) modeling
- Steel outfitting
- Accommodation outfitting
- Winterization & polar class studies
- NORSOK conversions
- Production Engineering
